

**INTERNATIONAL COMMISSION ON THE HISTORY  
OF GEOLOGICAL SCIENCES  
43<sup>RD</sup> CONFERENCE**

**November 12-16, 2018  
Mexico City**

**IMPORTANT DATES:**

- Deadline for abstract submission: **April 15<sup>th</sup>, 2018**
- Notification of acceptance and 2nd circular: **May 18<sup>th</sup>, 2018**
- Closure of early bird registration for Conference, Post-Meeting trip, and accompanying participant's registration: **July 15<sup>th</sup>, 2018**

**ABSTRACT SUBMISSION GUIDELINES**

Use the following guidelines and instructions to ensure that your abstract is entered correctly:

1. **Abstract Title**
2. **Author:** Provide your full name, academic degree(s), institution, address, and email address.
3. **Abstract Body**

The body of your abstract should describe the background, methods, results, and conclusions of your research. Do not exceed 2,000 characters (approximately 300 to 350 words). Please use formatted Microsoft Word, using size 12 Times New Roman font. The text should be and single-spaced.
4. **Conference Themes:** Select the most appropriate **theme** for the abstract (see below).

## Conference Themes

1. History of vulcanological studies.
2. Humboldt's influence in earth sciences.
3. Werner's Neptunist in America.
4. History of mining and oil research.
5. General contributions on the history of Geology

## One Sample Abstract:

### Overview of the History Economic Geology of Mexico, 19<sup>th</sup> Century

*Dr. Pedro García-López  
National School of Anthropology and History  
Avenida Antonio Mazo, Copilco, CP 04510, Mexico City  
pedrogarcia@gmail.com*

In recent years, in different parts of the world, new forms of tourism have appeared. The low impact generated by activities such as the observation of nature, the appreciation of specific landscapes and knowledge of natural or cultural scenarios from walks or bicycle rides, among others, are tourist variants friendly to the environment. This paper presents the most important findings of a study in the field of Tourism Geography in Mexico that examines how the region of Costa Chica de Guerrero (the coastal region east of Acapulco) is inserted into this concert of needs and new tourist demands, from the existence of unique tourism products, such as the presence of a coast cut by a significant number of rivers that serve as habitat to a biodiverse flora and fauna and the coexistence of indigenous groups (Amuzgos, Mixtecs) with Afro-Latin Americans which has resulted in the construction of a particular social and economic landscape.

**Conference theme:** 5. General contributions on the History of Geology
