

History of geological surveys

In July 2021, the 46th INHIGEO scientific conference will be held in Krakow. The main topic of the conference will be the history of the creation of geological surveys in various countries on all continents and their creators. The ambition of the conference organizers is to prepare a special publication in which these articles will be collected. Efforts will be made for this publication to appear in the Lyell Collection, Special Publication of Geological Society of London series. To ensure the consistency of all articles, the substantive scope of the articles is given below.

Please send information about your interest in the preparation of this kind of the article by August 31, 2020. Required date of preparation of the article - November 30, 2020. All articles will be reviewed.

General requirements and guidelines for Authors of articles about the history of the creation of geological surveys and their creators:

Required substantial scope of the article:

1. Title
2. Authors and affiliation
3. Abstract
4. Key words
5. General historical background
6. Conditions accompanying the establishment of the geological survey
7. Creator / creators of the geological survey and its the most prominent persons
8. Main goals of the activity of the geological survey and their changeability in the time
9. The most important achievements
10. Summary
11. Bibliography

The expected size of the article should not exceed 10,000 words plus figures, including up to 3 pieces in color.
